

## LETTER OF RECOMMENDATION

STRABAG
INTRARE / IESIRE 16-48
DATA 15-08-2005

Under the regulations of contract 4R13 "DN6 Rehabilitation. km. 298+000 – 332+150 Ciochiuta – Simian ", STRABAG – Tr. Severin Site, as general contractor, has used at bridge rehabilitation works several materials supplied by S.C. SOLARON CONSTRUCT S.R.L., Bucharest. All the products were received together with Technical Agreements, Technical data sheets and Quality and Compliance Certificates. Based on these documents, Hyder Consulting, the consultancy company for the above mentioned contract, has approved the products.

Among the products distributed by S.C. SOLARON CONSTRUCT S.R.L. used for the rehabilitation of B2 Timna, DN6 km. 304+440 passage way, designed by Search Corporation Bucharest, we appreciate the characteristics of O2C protection paint (EuroCret Colour), used as corrosion protection, which was easily put into works, the technical features of this material corresponding to the ones in the data sheet. After application, the paint had a good evolution in time.
